

# BEST ON-WALL SPEAKER SYSTEM

## ATC HTS7 5.1

ATC's HTS7 SYSTEM proves that on-wall speakers needn't be a compromise of design over performance. Instead, these use the same drivers and sealed cabinet ethos as the company's SCM7 standmounts, re-engineered into slim-profile enclosures perfect for a discreet setup. The HTS7s place effects with a superior sense of

accuracy and space, unravel complex material with precision, and can switch from being coolly refined to joyfully visceral when content demands it. The accompanying C1 subwoofer, meanwhile, adds genuine LFE enjoyment. Cable management grooves, mounting templates and white cloth grilles aid installation.

### PRODUCT DETAILS

**PRICE** £3,500  
**TYPE** 5.1 on-wall  
**WEIGHT** 8kg (HTS7)  
**DIMENSIONS** (WxHxD)  
245 x 390 x 125mm  
**DISTRIBUTOR** ATC
